

Felker Brothers Corporation has received certification of our products (manufactured in Marshfield, WI, and Glasgow, KY) to the following:

**NSF/ANSI Standard 61 Drinking Water System Components**

NSF 61 is a standard that applies to the health effects of drinking water system components. The focus of the standard is evaluation that our products do not impart or leach contaminants or impurities into drinking water. Drinking water applications are becoming a large market for our products.

In Canada, 11 of 13 Provinces/Territories require drinking water system components to comply with NSF 61, and 35 states in the US recognize NSF 61 as a policy for drinking water systems.

**NSF/ANSI Standard 372 Drinking Water System Components – Lead Content**

NSF 372 is a standard that applies to the health effects of drinking water system components – lead content/“lead free” status.

What does “lead free” mean? Per the U.S. Safe Drinking Water Act (SDWA), any wetted surfaces of pipes, pipe fittings, plumbing fittings and fixtures must meet a weighted average lead content of no more than .25%.
